

COMMUNITY GRANTS SCHEME

PROJECT EVALUATION REPORT

GOVERNMENT OF
WESTERN AUSTRALIA

A project funded by the state government
and administered by the Waste Authority

Contract number:	762
Organisation:	Bedfordale Connect Inc
Project Title:	Towards a Waste Free Future - Tackling waste at the Bedfordale Bush Markets
Grant Amount:	\$9,666 excl GST

This publication has been produced through a grant project funded by the State Government through the Waste Avoidance and Resource Recovery Account, and administered by the Waste Authority.

The views expressed are those of the authors and do not necessarily reflect the position or policy of the Waste Authority or Government of Western Australia, which may not be held responsible for the accuracy of information provided, nor is it liable for any and all outcomes from the use of this information

ORGANISATION & PROJECT DESCRIPTION

- A brief overview of your organisation/group.
- A detailed description of the project, including your anticipated goals and outcomes /achievements.

The Bedfordale Bush Markets is a small monthly market consisting of approximately 60 stalls selling mixed produce, food, art and craft. It is located in the foothills of Perth, five kilometres east of Armadale at the Bedfordale Hall (Admiral Rd, Bedfordale). It is run by Bedfordale Connect Inc which consists of a motivated committee of 4 local volunteers.

The markets showcase some of the local produce grown in the area. Bedfordale has some highly fertile alluvial soils which historically have provided food to the Perth region. There are a number of former market gardens with established fruit trees and large residential properties where there is an over supply of food grown which at times goes to waste. The markets provide a venue for small farmers and other locals with excess produce to sell their food when it might otherwise be placed in the green waste bin or contribute to the Mediterranean fruit fly problem.

The market also encourages stallholders wishing to sell secondhand goods and have been an important part of building community connections which in turn helps locals to identify opportunities to swap, borrow and share resources.

To expand on the sustainability ethos of the markets the Bedfordale Bush Markets Committee (Bedfordale Connect Inc) has over a number of years worked to reduce the waste impact of the market itself. Particularly by reducing food waste, plastic bag use and food disposables.

The objectives of this project were to;

- Reduce food waste at the markets;
- Reduce the number of disposables (plastic bags, coffee cups, water bottles) used;
- Increase uncontaminated recycling by encouraging patrons to correctly recycle at the market and bring things from home to recycle at the recycling hub.

We worked to achieve these objectives through a number of activities;

1. Waste themed children's activities;

The funds were used to employ two children's entertainers with a waste related theme, the Eco Faeries at our September 2018 Market and Captain Cleanup at our March 2019 Market. Robyn Brown from Waste is my Resource also attended the July 2019 market to run a children's activity – making worm farms out of recycled bottles. These entertainers were a popular and an effective way of spreading the waste reduction message.

2. Food scrap recycling

Food scrap and compostable waste bins were purchased for use at the markets. Signage was developed and refined over time to encourage people to place the correct waste in each bin. The compostable waste was taken to a committee member's home compost heap.

3. A washing up station for coffee cups at the market;

As the markets grew over the year 2 mug washing up stands can now be in operation at the market when there is two coffee vans are present.

In addition to the coffee cup washing up station a water dispenser is also set up to allow people to either fill up their own water bottles or use one of our re-useable cups.

4. Printing reusable calico bags for use at the markets;

Reusable cotton bags were printed and are sold for a gold coin donation to Bedforddale Connect Inc at the markets to reduce plastic bag use.

5. Encouraging people to recycle more obscure items by creating a reuse/recycling hub at the markets;

Terracycle recycling boxes for coffee capsules, pens and markers, snack wrappers, beauty products, computer media and toys were purchased and have become part of a recycling hub at the markets. The coffee capsules box was quickly filled with the pens and markers box and snack wrappers box not yet being filled. A second Terracycle coffee pods bin was purchased to replace the first. While we registered for some of the free Terracycle boxes a lot of these industry programs were already fully subscribed.

The beauty products, computer media and toys boxes were purchased at the end of the grant period so it is unknown at this stage how well they will be used. At the markets we also collect a range of other items such as bottle caps, cardboard tubes and jars for craft and local reuse.

6. Educating the community through waste volunteers who will guide people to recycle correctly at the event;

A donation of \$200 was offered to local community groups to act as volunteers to man the washing up station, the recycling hub and recycling bins to ensure recycling is being done correctly. They also collected and recycled litter at the market which is particularly important in our bushland setting.

At our March 2019 market (which had the theme Reduce, Reuse, Recycle), keep cups and metal straws were offered as prizes to community members who recycled correctly. The groups involved were; Bedforddale Volunteer Bushfire Brigade (BVBB) Cadets, Armadale Scouts, Challis Community School P & C, Cecil Andrews Senior High School Armadale police rangers and Xavier Catholic College.

The processes we used with these groups improved over time and this coupled with working with stallholders to reduce their plastic disposables and improved recycling signage meant that in the final two markets we were able to see great reductions in contamination of the compostable waste and recycling bins and a large increase in the amount of compostable material collected. Based on a visual estimation contamination dropped from approximately 40% to 10%. This organic waste was taken to one of the committee members houses for home composting. Two yellow bin toppers were also purchased for the recycling bins to improve the recycling rate of drink containers.

7. Educating stallholders and volunteers through waste education workshops.

A number of initiatives were used to engage stallholders to reduce their use of plastic disposables. Bedforddale Connect Inc engaged Robyn Brown from Waste is My Resource to deliver a presentation at the Bedforddale Connect AGM. Despite offering an incentive for stallholders to attend (a free stall) and extensive promotion only 3 stallholders were able to attend.

We revised our approach and engaged Robyn a second time to attend the March markets (which had a Reduce, Reuse, Recycle theme). At this market Robyn approached each stallholder to talk to them about their waste. This was a much more successful approach. This work resulted in a number of changes including one of the main food vendors

changing from plastic to wooden forks and knives. This had the major effect of almost eliminating plastic contamination in the compostable bin.

Our regular juice van, CWA and crepe stall now provide their leftover food scraps from their stalls for compost. Our coffee van and crepe van also now offer a discount for people who bring their own cups and plates.

Robyn also worked with the BVBB cadets to educate them about recycling and walked around with them to help the community to recycle properly. The recycling monitors presented prizes to the community who were recycling correctly.

Two large containers were purchased to allow the markets to transport and sell bread without using plastic bags.

We also recently updated our stallholder application form terms and conditions to ask that stallholders avoid the use of single use plastics.

8. Advertising

The markets and these waste initiatives were heavily promoted using Facebook event boosting as well as through Buggys Buddys. The Waste Management Authority was acknowledged in all advertising and promotional material. In addition to the boosted posts we regularly ran a series of posts telling people about bringing their own reuseables and promoting our recycling hub. These posts increased the reach of the project beyond the people just attending the markets.

EVALUATION / RESULTS - DATA

What kind(s) of project data/information did you collect?

Approximately 1 X 75l bin of compostable materials was collected and composted on average at each market. Except for the August Market where nearly 3 x 75 litre bins were collected.

The Terracycle bin for coffee capsules was filled over 8 months. The snack wrappers and pens and were only partially filled in that time.

There was on average 4 volunteer recycling monitors at each market.

Robyn from Waste is my Resource engaged with all food vendors at the March market. 3 stallholders attended the AGM talk.

The Facebook advertising was very successful with a reach of over 20,000 people over the grant period.

Was your project successful in the way you expected?

Did you achieve what you set out to do? (did you reuse/reduce/recycle as much as you had planned to?) If not, what happened?

YES

NO

We felt the project was successful as it helped us to refine our processes with regards to waste and recycling at the market and engage with a large part of the community through the volunteer recycling monitors, stallholders and market patrons.

Contamination rates dropped and we diverted a significant amount of the market's organic waste from landfill. Based on a visual estimation contamination dropped from approximately 40% to 10%.

Do you feel your project made a positive difference in your community and why?

YES

NO

We had a lot of positive feedback from the community about the project on facebook and in person. The project enabled us to engage with community groups who we had not worked with before and work with people who may not have been exposed to the waste reduction message in the past. The food vendors who come to our markets also attend other markets and it is hoped that they will adopt these practices as business as usual at other markets.

In addition a member of the community approached Bedfordale Connect Inc wishing to start up a clothes exchange. She organised a clothes rack and sign to be part of our recycling hub at the markets alongside our existing book swap and recycling bins. Both the book and clothes swap are highly utilised by the community. They are also left at the hall where the local playgroup and church group are able to use them.

How many people in total do you think your project has reached/affected?

Based on the Facebook post reach statistics I think this project has reached approx. 20,000 people. We have around 80 stallholders who were exposed to the project and approximately 5 to 700 people attending each market.

LESSONS LEARNT

What lessons were learned through the project – what worked and didn't work?

What, if anything, would you do differently if you were to do the project again?

The recycling monitors were an excellent way to engage local youth and involve them in community service. Many were highly motivated and passionate about reducing waste. We would like to continue this service although it will be interesting to see how many volunteers we are able to get without a donation incentive.

Having a clear education and briefing process for the recycling monitors as well as very clear signage that is specific to the event was found to greatly reduce contamination of the compostable waste.

We did initially have separate bins for food and compostable waste but realised that this was unnecessary and possibly adding to confusion about the recycling. The initial bin signage was also generic and only placed on top of the bin. Robyn provided recommendations to improve this by also placing a larger sign on the side of the bin (which allows people to see it as they approach). We also refined the wording to reflect the exact waste we get at the markets (eg coffee cups, plastic cups, plastic cutlery, serviettes etc) rather than more generic signage for recycling which includes items that are not commonly found at the markets (eg newspaper, tin cans, milk bottles etc).

Having a workshop for stallholders was also not particularly successful whereas approaching stallholders individually at the markets worked well. Stallholders are generally busy and coming along to a separate workshop creates an additional barrier. Approaching stallholders also allowed us to reach people who may not have usually been open to the waste reduction message. Robyn's discussions with our crepe food vendor directly resulted in the vendor changing to wooden cutlery was a major factor in the reduction of plastic contamination in the compostables bin.

Did you encounter any problems/challenges in carrying out the project? If so, what were they?

Community groups cancelling last minute or not showing up as promised was an issue at two markets.

We also had difficulty finding individual volunteers and found it was easier to organise groups.

What advice would you give to other groups considering undertaking similar projects?

We would recommend using recycling monitors to reduce litter and improve recycling rates. We found it useful to have a box with a clear set of instructions, gloves, tongs and high vis vests ready to go. We also found it important to speak to them in general about waste issues and the specifics of recycling at the market so they were well aware of the context behind why they were doing that work.

The facebook advertising was also highly effective.

ACKNOWLEDGEMENT / PROMOTION

Does your organisation (or project) have a website or Facebook page?

www.bedfordalemarket.com.au

<https://www.facebook.com/bedfordalemarkets/>

How did you acknowledge the Community Grants Scheme funding you received?

The Community Grants Scheme was acknowledged in all Facebook posts regarding the project and in advertising purchased from Buggy Buddys. The Waste Authority logo has been placed on the website and on recycling signage. The logo and acknowledgement is also on the market flyers.

Did you purchase any capital equipment with your grant money? (this includes things like sheds and large pieces of equipment)

No major capital equipment was purchased. Some bins and basins were purchased for the recycling hub and washing up stations. The revised signage has the Waste Authority logo on it.

Were there any promotional / media opportunities for the project? (newspaper articles, photos) If yes, please ensure you attach copies or include screen prints

YES

NO

The project was promoted in the Examiner local newspaper in September 2018.

Did you produce any promotional material for the project? (flyers, brochures even screen prints of online promotion – Facebook posts etc) If yes, please ensure you attach copies or include screen prints

YES

NO

Facebook screen prints attached

VARIATIONS & EXTENSIONS

Were you able to complete your project in the approved timeframe?

YES

NO

If there were variations or extensions, what were the cause(s)?

We did not initially spend all of the money due to some items being cheaper than expected so the project was extended for a month to allow us to spend the money purchasing additional recycling bins for the following market.

FUTURE PROJECTS

Did any opportunities or ideas arise during the project?

YES

NO

Do you now have ideas for other future projects?

We would like to build on the success of the recycling monitors and expand this to future markets.

Improve the current book swap by creating a more sturdy bookshelf on wheels which allows it to be moved easily to be placed in the recycling hub at the markets.

Continue to find new ways to work with stallholders to reduce their waste.

Work with another local group who have recently been awarded a grant to purchase a plastic grinder and re-processor. We would like to collect plastics and actually re-process them at the markets.

Start or support a local Boomerang Bags group to bring bags to the markets.

PROJECT PHOTOS

Please attach project photos, screen prints of promotional materials and their brief descriptions here.

Attention Community Groups! Would you like to raise some funds?

The Bedfordale Bush Markets is looking for groups to supply 3-4 volunteers who are willing to be recycling monitors at the June and/or July markets. Jobs include setting up and monitoring recycling stations and water refill station, washing up re-useable mugs for the coffee vans and picking up litter. Community groups will receive a \$200 donation. All training and equipment provided. It's a great opportunity to learn a bit more about recycling and help reduce the environmental impact of our markets! If your group is interested contact bedfordalemarkets@gmail.com.

This project is funded by the State Government through the Waste Avoidance and Resource Recovery Account, and administered by the Waste Authority of Western Australia

We have implemented a new recycling system thanks to the Waste Authority of Western Australia

You CAN recycle:

- Food waste (which goes to some local chickens), 🍌🍌🍌🍌
- Serviettes and un-coated paper plates (which goes to a local compost heap) and
- Plastic bottles, aluminium drink cans, paper and cardboard (which goes to the normal Council recycling bin) 📄

You CAN'T recycle coffee cups, plastic (or plastic coated) plates, plastic wrappers or plastic drink cups. (These need to go in the waste bins). 🗑️

Confused? If you need a hand working it out, check the signs on the bins. There will also be some friendly volunteer recycling monitors wandering the markets ready to give you a hand.

****TerraCycle drop off point****

TerraCycle offer recycling solutions for hard to recycle things. Material that is collected is posted to them where they will reuse, upcycle or recycle it into new plastic. In the recycling hub we now have bins for pens and markers, coffee capsules (any type) and snack wrappers so start collecting!

The bins will be located in the back room of the hall next to the clothes and book swap.

Did you know that coffee cups, plastic cups, disposable plates and serviettes (if they are contaminated with food) can't be recycled? These make up most of the waste generated at the markets.

Solution? Bring your own re-useable coffee cup, drink bottle, plates and cutlery to the Reduce Reuse Recycle markets this Saturday! There will be a free water bottle refill station.

If you happen to forget your re-useable mug there will be "boomerang" mugs available at the coffee vans. Just use the mug to order your coffee and place it in the bucket to be cleaned by our wonderful volunteer recycling monitors.

Clothing swap

Event boosting

Below are some of the examples of the results we got from event boosting on Facebook. We experimented with using ad campaigns and different formats for the ads as you can see below. The event boosting was very effective with the ads reaching between 2- 9 thousand people for each event.

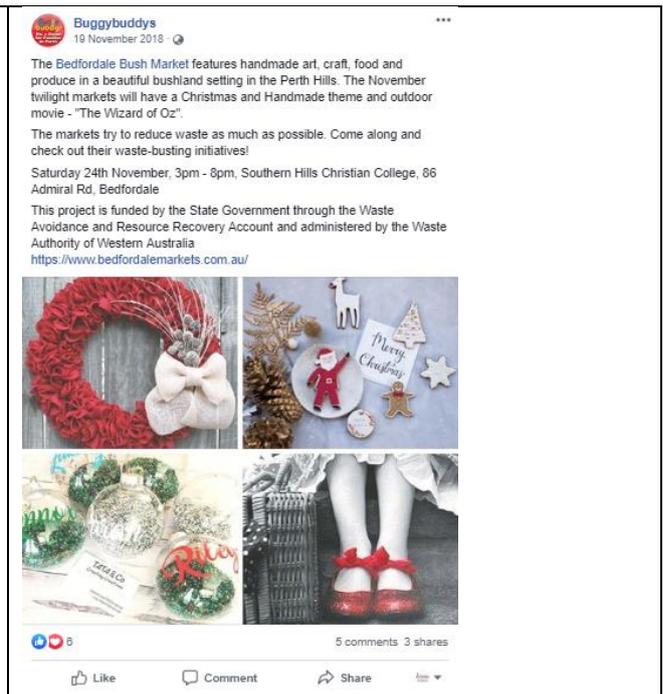

The following table summarizes the key performance indicators from the six Facebook ad reports shown in the screenshots:

Ad Campaign	People Reached	Event Responses	Amount Spent	Run Duration	Target Audience
September Bedforddale Bush Market - Nature Conservation	8,703	501	\$100.00	17 days	Men and women, ages 28-65+, 1 location, 5 interests
October Bedforddale Bush Market - Childrens & Pets	9,287	240	\$120.00	10 days	Men and women, ages 28-65+, 1 location, 5 interests
Bedforddale Bush Market (Indoor Christmas & Handmade Twilight Markets)	8,062	307	\$120.00	16 days	Men and women, ages 28-65+, 1 location
Bedforddale Bush Market (April Market Health & Wellbeing)	4,667	122	\$100.00	1 day	Men and women, ages 18-65+, 1 location
Bedforddale Bush Market (MAY MARKET "Art & Photography")	2,820	96	\$35.00	12 days	Men and women, ages 18-65+, 1 location
Bedforddale Bush Market (June Market)	6,646	262	\$100.00	13 days	Men and women, ages 18-65+, 1 location

Buggy Buddys Advertising

Advertising packages were purchased from Buggy Buddys. Anecdotally we noticed an increase in traffic to our page following the Buggy Buddy posts and a stallholder also commented that she had frequently seen the ads on Buggy Buddys. Buggy Buddys was chosen as they have 75,000 likes on Facebook and there is therefore the opportunity to reach a very wide audience across Perth. We experimented with different formats and images to determine the best response. Below are some examples of the posts.
