

Multiple Unit Developments – Better Practice

Current Better Practice Guidance

- In 2016/17 WALGA developed Better Practice Guidance to increase Resource Recovery from MUDs
- This was focused largely on recycling, not GO or FOGO
- The Guidelines were piloted with the Cities of Perth, Vincent and Stirling.

- Fast forward.... August 2020 formed FOGO in MUDs Working Group (WMRC, EMRC, Stirling, Kalamunda, Bunbury, Vincent, Vic Park, Collie, SMRC and Rockingham)
- September 2020 – Submitted a Waste Sorted Grant application to update WALGA Guidance and develop a Better Practice Guideline which includes FOGO, pilot the Guidelines and develop a waste generation calculator.

Current Better Practice Guidance

- Identify and contact the **Strata Company** with responsibility for the MDD.
- Identify the current levels of service provision to the MDD and how this service is being used (**identify bins and contamination**)
- Identify language groups in the area the MDD is located and other demographic factors which may influence the engagement approaches undertaken (**demographics**)

Current Better Practice Guidance

- Identify the suite of approaches needed for **engagement**.

	Low	Medium	High
Information			
Stickers on lid of bin		X	X
Signage in the bin area	X	X	X
Leaflets to residents		X	X
Letters to residents	X	X	X
Engagement			
Onsite bin inspections	X	X	X
Bin Tagging		X	X
Door knocking			X
Displays in building foyer		X	X
Meeting with community groups*	This maybe an option for some MDDs, to be considered along with other approaches.		
Presenting at schools*			

Current Better Practice Guidance

- Identify **infrastructure** needed to facilitate increase resource recovery and source separation.
- Identify the frequency and approach to **vergeside** collection needed for the MDD.
- **Evaluate** the success of the interventions.
- **Monitor** the ongoing effectiveness of the waste management intervention.
