

Waste and recycling snapshot: Western Australia 2022–23

■ energy recovery ■ material recovery ■ landfill

Data sourced from *Waste and recycling in Western Australia 2022–23* and national waste generation and recycling data. Some recycling data is estimated based on assumptions provided within these sources. Band width is proportional to tonnes.

* Recovery rates of individual C&D materials cannot be estimated. Quantities of recovered C&D material types are provided in the *Waste and recycling in Western Australia 2022–23* report and Recycling dashboard.
